# THE FEI CODE OF CONDUCT FOR THE WELFARE OF THE HORSE

- The Fédération Equestre Internationale (FEI) expects all those involved in international equestrian sport to adhere to the FEI's Code of Conduct and to acknowledge and accept that at all times the welfare of the horse must be paramount and must never be subordinated to competitive or commercial influences.
- At all stages during the preparation and training of competition horses, welfare must take precedence over all other demands. This includes good horse management, training methods, farriery and tack, and transportation.
- Horses and competitors must be fit, competent and in good health before they are allowed to compete. This encompasses medication use, surgical procedures that threaten welfare or safety, pregnancy in mares and the misuse of aids.
- Events must not prejudice horse welfare. This involves paying careful attention to the competition areas, ground surfaces, weather conditions, stabling, site safety and fitness of the horse for onward travel after the event.
- Every effort must be made to ensure that horses receive proper attention after they have competed and that they are treated humanely when their competition careers are over. This covers proper veterinary care, competition injuries, retirement and euthanasia. The FEI urges all involved with the sport to attain the highest levels of education in their areas of expertise.

## TRUE HEALTH BEGINS IN THE GUT

Acute stress affects horses in many ways: They stop eating. They stop drinking. Muscles can fatigue quickly with dehydration and can result in reduced nutrients available to support energy production.

**Competitions, strenuous work, transport, illness, long days competing, extreme heat and humidity, extended times off feed or other major changes to your horses's normal routine can compromise gut health.** Gut bacterial populations can shift. Muscles and organs can be damaged with higher rates of oxidative stress.

Behaviour can become anxious and highly strung, and this behaviour then starts the stress cascade all over again. They stop eating. They stop drinking... and so it goes.

### Stress Paste can help

**Stress Paste is designed to specifically address each of these responses to stress and keep the horse eating and hydrated with well-functioning, well protected muscles.**

This is why it is complete with so many actives. Stress Paste is also designed to support the gut so it and its bacteria can remain healthy during higher stress periods.

## ATHLETE ANTI-DOPING INFORMATION

The Australian Sports Anti-Doping Authority (ASADA) is Australia's driving force for pure performance in sport and aims to protect Australia's sporting integrity through the elimination of doping. ASADA deters the use of banned doping practices in sport through education, testing, advocacy and coordination of Australia's anti-doping program. It is the organisation with prime responsibility for implementation of the World Anti-Doping Code in Australia.

Athletes are advised to check the status of their existing and new medications every year due to possible changes in conditions of use.

The WADA strict liability principle states the athlete is responsible for any substances detected, regardless of how they got there.

For any human anti-doping enquiries or further information, please contact

Victoria Kahn (Sports Science/Sports Medicine Manager, Equestrian Australia) [victoria.kahn@equestrian.org.au](mailto:victoria.kahn@equestrian.org.au)

Equestrian Australia (EA) condemns doping as fundamentally contrary to the spirit of sport. EA has an anti-doping policy in full compliance with the Federation Equestre Internationale (FEI), WADA and ASADA policies. All athletes and support personnel should familiarise themselves with the anti-doping policy and should contact EA if they have any queries.
