**Signature:** \_\_\_\_\_

**Date:** \_\_\_\_\_

At the General Assembly in April 2004, the FEI approved<sup>1</sup> the use of altrenogest (e.g. Regumate) for oestrus suppression in normally cycling mares competing in FEI competitions.

The following conditions apply:

1. Altrenogest is only permitted in mares;
2. The manufacturer's recommended dose of altrenogest and duration of treatment for oestrus suppression must be followed

*N.B. The manufacturer's contra-indications and warnings etc. must be noted and understood before using altrenogest. Horses will be tested for the presence of altrenogest.*
