Training Day and Working Bee Information

A good way to get to know other NTEC members is to participate in our working bees. These are usually good fun even if you are doing a little work as well. The working Bee on the 3rd Oct will consist of spraying gorse and piling up wood and burning piles. Please bring suitable equipment for spraying that would be appreciated or bring rakes and gloves.

Payments made by direct debit need to have a receipt number and as reference please use your surname and TD 3oct. If you are not a member as yet you will need to pay your membership before participation, the form is attached to newsletter. If you are paying your membership as well please put though a separate DD and as reference put Surname and membership. This helps our Treasurer sort out what is what.
